

SPEED DETECTION TRAILER REQUEST FORM

The Moscow Mills Police Department utilizes a mobile speed detection trailer to aid in speed enforcement. The trailer encourages drivers to slow down by displaying their speed as well as the posted speed limit. The trailer has the capability of recording a vehicle's speed as well as the number of vehicles which pass by the trailer. We can utilize statistics from the trailer to determine what additional enforcement activity may be effective in the area.

If you would like to request the speed trailer be placed in a specific area, complete and submit the form below. Your request will be placed in the order received. Placement also depends on current weather conditions.
